ECN/EQN 1300 series

Absolute rotary encoders

- 06 stator coupling for axial mounting
 - 65B tapered shaft

A = Bearing of mating shaft

Tolerance

ISO 2768:1989-mH
≤ 6 mm: ±0.2 mm

- Ⓐ = Bearing of mating shaft
 - Ⓜ = Required mating dimensions
 - Ⓜ = Measuring point for operating temperature
 - 1 = Clamping screw for coupling ring; width A/F 2
 - 2 = Die-cast cover
 - 3 = Screw plug; widths A/F 3 and 4
 - 4 = ECN/EQN: 12-pin PCB connector
ECN/EQN: 12-pin + 4-pin PCB connector
 - 5 = ECN/EQN: zero position of shaft and housing
 - 6 = M10 back-off thread
 - 7 = Self-locking screw: DIN 6912 – M5x50 – 08.8 SW4
 - 8 = Compensation of mounting tolerances and thermal expansion; no dynamic movement permitted
 - 9 = Direction of shaft rotation for ascending position values

Mounting

The tapered shaft of the rotary encoder is pressed onto the measured shaft and fastened with a central screw. The stator coupling is clamped by means of an axially tightenable screw in a location hole.

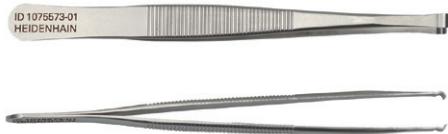

Mounting accessories

Mounting aid

To avoid damage to the cable, use the mounting aid to connect and disconnect the cable assembly. The pulling force must be applied solely to the connector and not to the wires.

ID 1075573-01

For more mounting information and mounting aids, see the Mounting Instructions and the *Encoders for Servo Drives* brochure. The mounting quality can be inspected with the PWM 21 and ATS software.

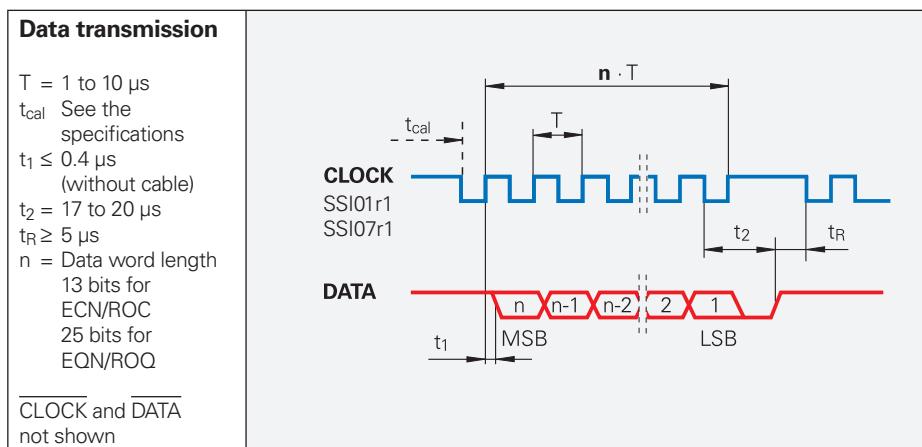

Interface

SSI position values

The **position value** is transmitted, starting with the most significant bit (MSB), over the data lines (DATA) in synchronism with a clock signal (CLOCK) provided by the control. The SSI-standard data word length for singleturn encoders is 13 bits, and for multturn encoders, 25 bits. In addition to the absolute position values, **incremental signals** can also be transmitted. For a description of the signals, see 1 V_{PP} incremental signals in the *Rotary Encoders* brochure.

The following **functions** cannot be activated via programming inputs:

- **Direction of rotation**
- **Zero reset** (setting to zero)
