1 Introduction

1.1 Meaning of the symbols used in this manual

Safety precautions
Comply with all safety precautions indicated in this User’s Manual and in your machine tool builder’s documentation!
The safety precautions have the following structure:

- Signal word
- Type of hazard
- Consequence of non-compliance
- Instructions for avoidance of hazards

In this User’s Manual, you will find the following informational notes:

**NOTICE**

**Notice** indicates danger to material or data. If you do not follow the avoidance instructions, the hazard could result in property damage.

Informational notes
Observe the informational notes provided in this User’s Manual to ensure reliable and efficient operation of your HEIDENHAIN product.

In this manual, you will find the following informational notes:

The information symbol indicates a **tip**.
A tip provides additional or supplementary information.

Cross references
Use the cross references in the documentation for subject-related and comprehensive additional information.

In this manual, you will find the following cross references:

The book symbol represents a **cross reference** to external documentation, e.g. the documentation of your machine tool builder or other supplier.

The globe symbol represents a cross reference to an Internet site.

Cross references within continuous text are indicated as **Further information**.
Cross references within tables contain the page numbers only.
1.2 About HEIDENHAIN Clone

With HEIDENHAIN Clone you can create a copy of the data medium of your HEIDENHAIN control. Data media are:

- HDR (Hard Disk Removable)
- CFR (Compact Flash Removable)
- SSDR (Solid State Disk Removable)

These data media are used in the following HEIDENHAIN controls:

- MC 3xx
- MC 420
- MC 422 B
- MC 422
- MC 422 D
- MC 6xxx
- MC 7xxx
- MC 8xxx

HEIDENHAIN Clone is very easy to use. After setting the boot options in the BIOS, you can boot directly from the USB hard disk. You are then guided step by step through a dialog-based menu.

As of MC 422C and all newer controls it is possible to boot directly from the supplied USB hard disk on the control. For the MC 420 and MC 422B you require a notebook and the USB-HDR adapter ID 529306-01.

By backing up all your data, you can significantly reduce machine downtime in the event of a failure of the data medium. Furthermore, you always have an up-to-date data backup available directly at the machine.

HEIDENHAIN Clone not only backs up the system files for starting a control, but also all user and manufacturer data!

HEIDENHAIN Clone is a product of the HEIDENHAIN Service in Traunreut/Germany and is based on the open source Clonezilla project.

**NOTICE**

Secure Boot

Damage to file system and loss of data

HEIDENHAIN CLONE does not support the UEFI specification Secure Boot.

The Clonezilla source code and further information can be found at: www.clonezilla.org
1.3 Items supplied

HEIDENHAIN Clone can be ordered from HEIDENHAIN with the ID 1069766-01. The data medium is a 2.5” USB drive with 1 TB memory size.

For the MC 420 and MC 422 B you also require the USB-HDR adapter ID 529306-01. This adapter must be ordered separately. Alternatively, you can purchase a SATA/PATA/IDE-to-USB adapter on the free market and use this adapter.

1.4 About this manual

The chapter Quickstart describes the steps for backup and restore in short, thus guiding you to the desired result very quickly.

In the chapter Step-by-step all working steps are described in detail.

You can find these instructions as PDF file on the backup partition of HEIDENHAIN Clone.
2 Safety precautions

2.1 Overview

HEIDENHAIN Clone

PC skills are required to use the software.

NOTICE

Loss of data!
If you use memory media with different capacities when restoring a data backup with HEIDENHAIN Clone, you may lose data.
- Use memory media with the same capacity

HEIDENHAIN does not assume liability for the completeness of the data backup and for the loss of data!

BIOS of the HEIDENHAIN controls

Various BIOS versions are used in HEIDENHAIN controls. Note that the screen contents shown in the manual may differ from your actual screen display.
If you have any questions, please contact HEIDENHAIN.

BIOS settings of HEIDENHAIN controls

NOTICE

Loss of data!
Wrong settings in the BIOS can result in a malfunction of the operating system and a loss of data.
- Ensure that the BIOS settings are correct
Removing or inserting the memory media

**NOTICE**

Loss of data!
If you remove or install memory media while the machine is running, you may lose data.
- Switch off the machine
- Remove or install the memory medium

For information, refer to the service manual.

Export license required

Note that export licensing is also required for the data backup (clone) of a memory media with software that is subject to export license.

Memory media for HEIDENHAIN controls

Only use original HEIDENHAIN parts (HDR, CFR, SSDR). In case non-HEIDENHAIN products are used, proper operation cannot be guaranteed.

Liability

HEIDENHAIN does not accept any responsibility for indirect or direct damage caused to persons or property through incorrect use or operation of the machine!

ESD protection

**ESD = Electrostatic discharge**

**NOTICE**

Electrostatic discharge (ESD)!
Improper handling can lead to damage to components or assemblies by ESD.
- Observe the ESD protective measures when exchanging HDR, SSDR and CFR
- Never touch connector pins without ensuring proper grounding
- When handling components, ensure that the working area (e.g. tool, workbench, packaging) and the person are properly grounded
- Inspect the ESD protection system regularly
3 Quickstart

3.1 MC 420, MC 422 B

For MC 420 and MC 422 B you require a separate PC and the USB-HDR adapter ID 529306-01. As an alternative, a universal hard-disk adapter can be used. Remove all unnecessary devices that are connected to the PC via USB. Only operate the HEIDENHAIN Clone hard disk, an external keyboard and the hard disk of the control via the USB interface of your PC.

3.1.1 Backing up data

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
</table>
| 1    | ▶ Switch off the main switch of the machine  
     | ▶ Take precautions against restart of the machine  
     | ▶ Ensure that the equipment is free of potential | See step-by-step instructions or Service Manual |
| 2    | ▶ Remove the HDR from the control (MC) | |
| 3    | ▶ Insert the HDR into the USB-HDR adapter (ID 529306-01) | |
| 4    | ▶ Connect the HEIDENHAIN Clone USB hard disk to the PC  
     | ▶ Call the boot menu during start-up  
     | ▶ Boot from the HEIDENHAIN Clone USB hard disk | The key for calling the boot menu varies depending on the PC manufacturer, e.g., F12, F8, Esc, … |
| 5    | When the HEIDENHAIN Clone screen appears  
     | ▶ Connect the hard disk of the control | See User’s Manual of your PC |
| 6    | ▶ In the main menu, select <HEIDENHAIN-CLONE BACKUP> | |
| 7    | ▶ Enter a title for the backup | |
| 8    | ▶ Select the hard disk of the control  
     | ▶ Follow the instructions on the screen | "sda" is usually the internal hard disk of your PC. Therefore, do not select "sda"! The hard disk of the control is e.g. "sdb 40GB" (depending on the number of connected drives). |

See step-by-step instructions
### 3.1.2 Restoring data

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
</table>
| 1    | ➤ Connect the HEIDENHAIN Clone USB hard disk to the PC  
➤ Call the boot menu during start-up  
➤ Boot from the HEIDENHAIN Clone USB hard disk | The key for calling the boot menu varies depending on the PC manufacturer, e.g., F12, F8, Esc, …  
See User’s Manual of your PC |
| 2    | When the HEIDENHAIN Clone screen appears  
➤ Connect the hard disk of the control | The hard disk must be in the USB-HDR adapter ID 529306-01 |
| 3    | ➤ In the main menu, select <HEIDENHAIN-CLONE RESTORE> | |
| 4    | ➤ Select the created backup | |
| 5    | ➤ Select the hard disk of the control  
➤ Follow the instructions on the screen | “sda” is usually the internal hard disk of your PC. Therefore, do not select “sda”! The hard disk of the control is e.g. “sdb 40GB” (depending on the number of connected drives).  
See step-by-step instructions |

**NOTICE**

**Loss of data**

If you select the wrong drive here, the hard disk of your PC may be overwritten!  
➤ Select the correct hard disk
3.2 MC 3xx, MC 422C, MC 422D, MC 6xxx, MC 7xxx, MC 8xxx

- All inputs should always be made using an external USB keyboard.
- Remove all unnecessary devices that are connected to the control via USB. Only operate the HEIDENHAIN Clone hard disk and an external keyboard directly on the MC via the USB interfaces. Do not use the USB connection on the keyboard unit.

3.2.1 Selecting the BIOS and UEFI settings depending on the control

<table>
<thead>
<tr>
<th>Select the BIOS settings for</th>
<th>Select the UEFI settings for</th>
</tr>
</thead>
<tbody>
<tr>
<td>MC 422C</td>
<td>MC 128</td>
</tr>
<tr>
<td>MC 422D</td>
<td>MC 3xx</td>
</tr>
<tr>
<td>MC 61xx</td>
<td>MC 64xx</td>

</tr>
</tbody>
</table>

The settings described can apply to other MCs.
### 3.2.2 Selecting the BIOS settings

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
</table>
| 1    | ► Connect the HEIDENHAIN Clone USB hard disk to the PC  
► Press the DEL key during booting  
► BIOS starts |  
| 2    | ► Select the Integrated Peripherals menu item  
► Select the USB Device Setting submenu  
► Set the USB Operation Mode entry to Full/Low Speed | Only for MC 6xxx, MC 7xxx, if the entry is available |
| 3    | ► Save the settings  
► Restart the control  
► Call the BIOS again | Only for MC 6xxx, MC 7xxx |
| 4    | ► Select the Advanced BIOS Features menu item |  
| 5    | ► Move the USB-HDD0 in the Hard Disk Boot Priority menu item to the top of the list | Only if available |
| 6    | ► Set the HEIDENHAIN Clone USB hard disk as the First Boot Device | Depending on the BIOS version, the menu item must be set to USB-FDD, USB-HDD, Removable, etc. |
| 7    | ► Set the Boot Other Device menu item to Enabled |  
| 8    | ► Call the Standard CMOS Features menu  
► Set the IDE Primary Master menu item to None | Only for MC 422C single processor |
| 9    | ► Save the settings  
► Restart the control |

### 3.2.3 Selecting the UEFI settings

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Press the EMERGENCY STOP button on the machine</td>
<td></td>
</tr>
<tr>
<td>2</td>
<td>Connect the HEIDENHAIN Clone USB hard disk to the USB connector on the MC</td>
<td></td>
</tr>
</tbody>
</table>
| 3    | Switch on the control  
|      | Press the F2 key repeatedly during startup  
|      | UEFI starts  
|      | If the UEFI screen does not appear:  
|      | Shut down the control  
|      | Repeat the procedure |     |
| 4    | Select the Boot menu with the arrow keys  
|      | USB HDD: Select the WD elements with the arrow keys  
|      | Use the Shift key and + key to move the highlighted hard disk to the top of the list |     |
| 5    | Press the arrow key to select Exit  
|      | Select Exit Saving Changes  
|      | Press the Enter key  
|      | Select Yes  
|      | Press the Enter key again  
|      | The control restarts  
|      | HEIDENHAIN Clone is started | With the German keyboard layout, “Y” is on “Z”. |
### 3.2.4 Backing up data

<table>
<thead>
<tr>
<th>Step</th>

<td>When the control is started again, call the BIOS</td>
<td>Activate the <strong>Load Optimized Defaults</strong> menu item</td>
</tr>
</tbody>
</table>
4 Step-by-step instructions

4.1 MC 420, MC 422B

For MC 420 and MC 422B you require a separate PC and the USB-HDR adapter ID 529306-01. As an alternative, a universal hard-disk adapter can be used. Remove all unnecessary devices that are connected to the PC via USB. Only operate the HEIDENHAIN Clone hard disk, an external keyboard and the hard disk of the control via the USB interface of your PC.
## 4.1.1 Backing up data

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
</table>
| 1    | ▶ Switch off the main switch of the machine  
▶ Take precautions against restart of the machine  
▶ Ensure that the equipment is free of potential | See Service Manual |
| 2    | ▶ Remove the HDR from the control (MC) | |
| 3    | ▶ Insert the HDR into the USB-HDR adapter (ID 529306-01) | Do not connect the adapter to the PC yet! |
| 4    | ▶ Connect the **HEIDENHAIN Clone** USB hard disk to the PC  
▶ Switch on the PC | The key for calling the boot menu varies depending on the PC manufacturer, e.g., F12, F8, Esc, … See User’s Manual of your PC |
| 5    | ▶ When the PC is switched on, repeatedly press the key used for calling the boot menu  
▶ The boot menu is displayed  
If the boot menu does not appear:  
▶ Restart the PC  
▶ Repeat the procedure | |
| 6    | ▶ Select the **HEIDENHAIN Clone** USB hard disk in the boot menu  
▶ Press the Enter key | Depending on the PC, the **HEIDENHAIN Clone** USB hard disk is designated **USB Device**, **USB Storage Device**, **Removable**, or similar, depending on the PC |

<tr>
<th>Step</th>
<th>Action</th>
<th>Info</th>
</tr>
</thead>
</table>
| 9    | When the text in the figure below is displayed   
▶ Remove the HEIDENHAIN Clone USB hard disk  
▶ Press the **Enter** key  
▶ **System halted** is displayed  
▶ Shut down the control | |

![Image: Unmounting local filesystems...done.]

Your hard disk has been restored and corresponds to the state of the backup.  
▶ Before the next start of the control, call the BIOS and activate the **Load Optimized Defaults** menu item as described in "Selecting BIOS settings"  
Now you can use your control as usual.
4.3  Additional functions

4.3.1  Backup control with auto file-system-repair

In the event of problems (e.g. error message: Partition has been mounted 28 times without being checked) during the creation of a backup, or if the control's hard disk is suspected to be defective, use BACKUP CONTROL with Auto-Filesys. -Rep. -possible loss of data!

With this function you have at least a small chance to create a working backup although data or hardware is damaged. Success cannot be guaranteed, however. Usually, it is too late if the HDR hardware is actually defective!

To run the function BACKUP CONTROL with Auto-Filesys. -Rep. -possible loss of data! select this function and follow the steps as described in Backup.
4.3.2 Restore only for NC SW 340xxx-xxx and CFR media

The function **RESTORE HEIDENHAIN CONTROL only for NC SW 340xxx-xxx AND CFR Media** may only be used with an NC SW 340xxx-xxx control software in combination with a CFR card.

To run the function **RESTORE HEIDENHAIN CONTROL only for NC SW 340xxx-xxx AND CFR Media**, select this function and follow the steps as described in **Restore**.
4.3.3 HEIDENHAIN control with vertical screen

For screens in portrait format, the function
<BACKUP HEIDENHAIN CONTROL with VERTICAL SCREEN> or
<RESTORE HEIDENHAIN CONTROL with VERTICAL SCREEN>
must be selected.

Affected monitors:
- MC 8410 with multitouch operation
- The function may also apply to other monitors

Select the function <BACKUP HEIDENHAIN CONTROL with VERTICAL SCREEN>
or <RESTORE HEIDENHAIN CONTROL with VERTICAL SCREEN>
Press the Enter key

To run the BACKUP CONTROL function, select this function and perform the steps as described in "Backing up data"
To run the BACKUP CONTROL with Auto-Filesys. -Rep. -possible loss of data! function, select this function and perform the steps as described in "Backup control with auto file-system-repair"
To run the RESTORE BACKUP CONTROL function, select this function and perform the steps as described in "Restoring data"
4.3.4 Backup HEIDENHAIN control IPC

To run the <BACKUP HEIDENHAIN CONTROL IPC> function, select this function

Press the Enter key

The following option is available:

To run the function, see chapter “Backing up data”.

HEIDENHAIN Clone 5
4.3.5  Restore HEIDENHAIN control IPC

To run the <RESTORE HEIDENHAIN CONTROL IPC> function, select this function

Press the Enter key

The following option is available:

To run the function, see chapter “Restoring data”.
4.3.6 Backup standard PC

To run the *Backup standard PC* function, select this function.

Use the * and + keys to select which entry is highlighted. Press enter to boot the selected OS. 'e' to edit the commands before booting or 'c' for a command-line. Esc to return.

**HEIDENHAIN Clone 5**

- Press the **Enter** key.
- The following options are available:

usually, the function *Backup for PCs* should be selected. If an error occurs or the screen remains black, use the function *Backup for older PCs*. To run the function, see chapter "Backing up data."
4.3.7  Restore standard PC

To run the `<RESTORE STANDARD PC>` function, select this function.

Press the Enter key.

The following options are available:

- RESTORE for PCs
- RESTORE for older PCs
- Clonezilla live (not recommended)

Usually, the function RESTORE for PCs should be selected. If an error occurs or the screen remains black, use the function RESTORE for older PCs. To run the function, see chapter "Restoring data".
### 4.3.8 Clonezilla live

**NOTICE**

**Improper use**

If the **Clonezilla live (not recommended)** function is used without detailed knowledge, this can lead to data loss on the data carrier of the control, the PC or in the network.

- Only use this function if you have comprehensive Linux and IT knowledge
- Only use this function to solve problematic and special cases

The **Clonezilla live (not recommended)** function is not required for copying data media of HEIDENHAIN controls. All settings and changes necessary for solving problematic and special cases, can be made in the Clonezilla software. The function is not described in this manual.

---

**GNU GRUB version 1.99-27**

Press enter to boot the selected OS, ‘e’ to edit the commands
before booting or ‘c’ for a command-line. ESC to return.

HEIDENHAIN Clone 5
Clonezilla live (not recommended)
Managing the created backups

5.1 In Microsoft Windows

You can store several backups on the hard disk of the HEIDENHAIN Clone. For managing your backups you can connect HEIDENHAIN Clone in Microsoft Windows. After connecting the hard disk, two additional drives appear in the file system.

Do not make any changes in the "JH-CLONE" drive! The HEIDENHAIN Clone operating software is located there.

You can find your backups in the "JH_Backup" subdirectory on the "Backups" drive.

For each backup a directory with a freely selectable name is created. There you can delete or copy your backups, or move them to another file server, etc.
